1. INTRODUCTION

This document provides the specific description of a subset of the EDIFACT DESADV D97.A message to be used between a Trading Partner and Shape.

2. MESSAGE DEFINITION

This document provides the definition of an Advanced Shipping Notification (ASN) or Despatch Advice Message, based on the EDIFACT DESADV D97.A, to be used in Electronic Data Interchange (EDI) between a Trading Partner and Shape.

This documentation is fully comprehensive and allows the implementation of the EDIFACT DESADV without the necessity for any additional standard related documentation.

2.1. FUNCTIONAL DEFINITION

The ASN/Despatch Advice message is a message from a Shape Supplier to the relevant Shape application. It gives information concerning material despatched to a Shape location as instructed by a previously received Delivery Instruction or Shipping Schedule message and in line with the conditions set out in the contract or order.

2.2. PRINCIPLES

The ASN/Despatch Advice message intends to:

- advise the recipient (Consignee) of the despatch of goods and to provide the details regarding the content of the consignment.
- allow the recipient (Consignee) to track material shipments and to prepare the physical receipt of the consignment.

An ASN/Despatch Advice message can relate to:

- different articles which may be packed differently (as instructed or agreed).
- articles covered by different Delivery Instruction and/or Stock Status messages.

The ASN/Despatch Advice message must always include the transportation information (e.g., weight, means of transport, etc.) related to the load advised.

As the information transmitted in the ASN/Despatch Advice is vital to ensure an efficient receipt of the material at the receiving plant and since, whenever a Consolidator is involved, this information needs to be consolidated with other messages. **Therefore it is mandatory that the ASN/Despatch Advice is sent immediately after the departure of the material.**

2.3. REFERENCES

The content of this message is based on:

- the message structure as defined by EDIFACT for the UNSM Despatch Advice Message DESADV as published in the UN/EDIFACT D97.A Directory.
- the agreement between the Trading Partners on the data elements to be used, their unique definition, their representation and their values (coded or clear form) as identified in this document.

2.4. FIELD OF APPLICATION

The following definition of an ASN/Despatch Advice Message in EDIFACT format is applicable for the interchange of shipping instructions issued by Shape for material deliveries to one or more Shape operations.

3. MESSAGE DESCRIPTION

Following pages contain a full description of the EDIFACT DESADV D97.A message as implemented by Shape. All segments are included regardless whether used or not used in the interchange with Shape. The official EDIFACT segment description is complemented with remarks pertaining to the specific requirements for an interchange with Shape. Those remarks contain specific code values used, additional information on the values shown in a specific field, etc.

3.1. INTRODUCTION

3.1.1. How to read the documentation

All segments in the subset used by Shape are described in the following pages. The segment description is to be read as follows:

① 0020

BGM - BEGINNING OF MESSAGE

② Segment group:	none.	Level:	1.
③ EDIFACT status:	mandatory.	Shape status:	mandatory.
④ Maximum use:	1 per message.	Shape occurrences:	1 per message.
⑤ Function:	Segment for the unique identification of the delivery schedule document, by means of its name and its number.		
⑥ Shape interchange:	see remarks.		

⑥ Example:

BGM+++123456+9'

A B

“+” separates segment sections; “:” separates elements within a segment section

⑦ ⑧	REF	TAG	EDIFACT STANDARD DEFINITION				SHAPE IMPLEMENTATION			REMARKS
			NAME	ST	FT	SP	ST	FT		
⑨	A	C002	DOCUMENT/MESSAGE NAME	C						
		1001	Document/message name, coded	C	an..3	:				
		1131	Code list qualifier	C	an..3	:				
		3055	Code list responsible agency, coded	C	an..3	:				
		1000	Document/message name	C	an..35	+				
	A	C106	DOCUMENT/MESSAGE IDENTIFICATION	C			M			
		1004	Document/message number	C	an..35	:	M	an..10	A unique control number, commonly called a Shipment Identification Number (SID), assigned by the original shipper to identify a specific shipment. This unique control number cannot be repeated within a one-year period. This number must be referenced on both the packing list and the bill of lading as the Shipment Identification Number (SID). The SID number will be used by SHAPE as the reference number on the payment remittance to the supplier.	
		1056	Version	C	an..9	:				
		1060	Revision number	C	an..6	+				
		1225	MESSAGE FUNCTION, CODED	C	an..3	+	M	an..3	Function of the message. For code values see below. Note: "9" is currently the only code which Shape will automatically process.	
		4343	RESPONSE TYPE, CODED	C	an..3	'				

⑩ **COMMENTS**⑩ **CODE VALUES****LEGEND**

- ① segment position in the message structure, segment tag and segment name.
- ② identification (when applicable) of the segment group in which the segment is situated and indication at which level the segment is in the message.
- ③ status of the segment: as defined by EDIFACT and by Shape.
- ④ number of occurrences of the segment: as defined by EDIFACT and as used by Shape.
- ⑤ description of the function of the segment as defined by EDIFACT and as used by Shape.
- ⑥ example of the segment as it may appear in an interchange. This example is only illustrative and does not necessarily represent an actual situation. It should **NOT** be used as a basis to implement this message.
- ⑦ definition of the segment content as defined by EDIFACT and as implemented by Shape.
- ⑧ identification of the data elements in the segment
 - reference to the example.
 - data element tag - data elements with a 'C' denote a composite data element.
 - data element name - *CAPITALS* denote a composite data element.
 - **ST** - the status of the data element.
 - **FT** - the format of the data element, i.e. the indication of the number of characters (numerical or alphabetical) for this data element.
 - **SP** - the separator used between the data elements.
 - remarks on the specific use of the data element in the interchange with Shape.
- ⑨ Shaded areas in the Shape description mean that Shape does not use the data elements.
- ⑩ the segment description can be followed by:
 - comments providing more information regarding specific data elements and how they must be used and/or understood in messages from Shape.
 - code values to be used for data elements contained in the message.

3.1.2. General remarks

Following remarks are applicable for the complete documentation:

Dates

Unless otherwise specified in the field explanation in the documentation, dates are always expressed as **CCYYMMDD** (qualifier 2379 = 102).

Times

Unless otherwise specified in the field explanation in the documentation, times are always expressed as **HHMM**.

Shape Status

Mandatory: All data elements Marked "Mandatory" should be returned in the DESADV

Conditional: All data elements Marked "Conditional" should be returned in DESADV if sent in the DELFOR / based on some conditions.

Optional: All data elements marked "Optional" may/may not be returned in the DESADV

3.2. SEGMENT TABLE

The following table shows the segments defined for the EDIFACT UNSM DESADV D97.A Despatch Advice message. Shaded areas identify the segments that are not used in the subset of DESADV used by Shape. This table, which should be read in conjunction with the branching diagram indicates the maximum number of occurrences for each segment.

POS.	TAG	NAME	ST	REPEATS

3.3. BRANCHING DIAGRAM

The branching diagram shows the structure of the message. It is a combination of various segments that are organized in a certain hierarchical order.

A segment is a pre-defined set of functionally related values (e.g., segment NAD groups all values that relate to a Party: name - address - etc.)

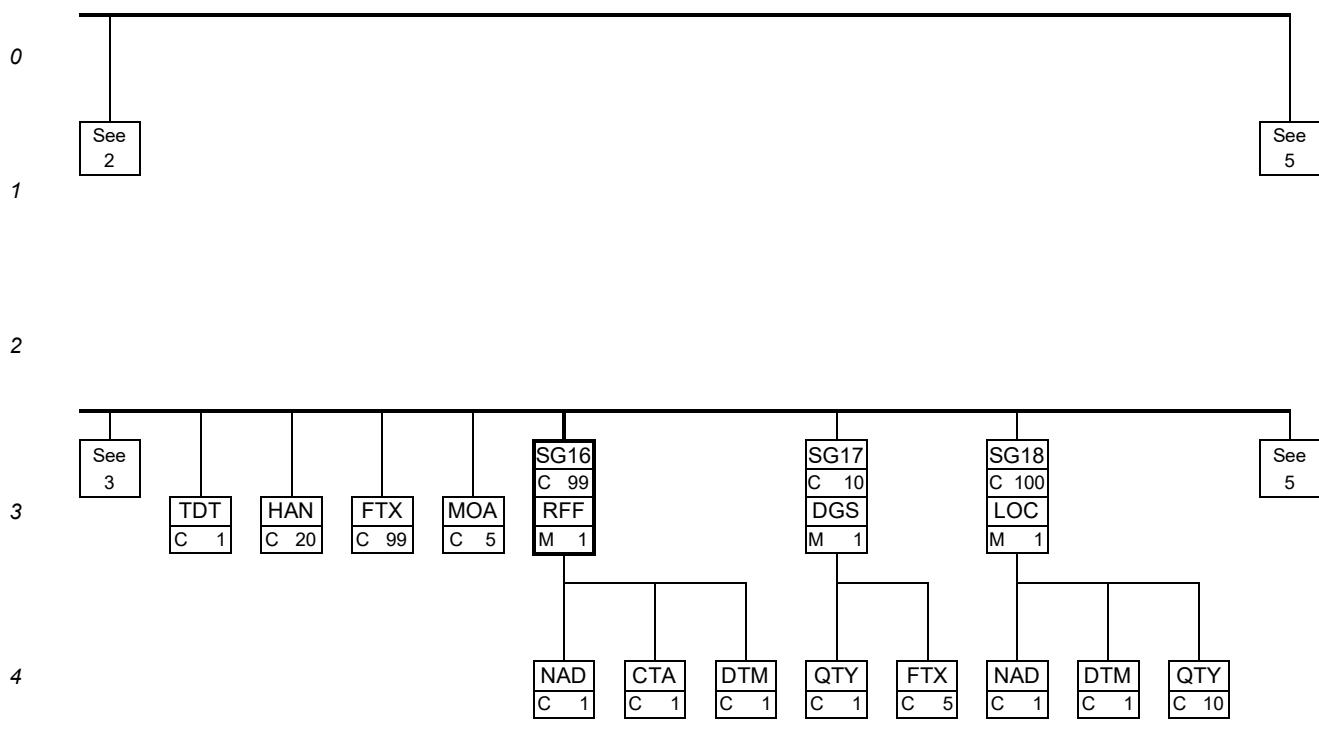

Each segment within the branching diagram is broken down into one or multiple data elements. Within a segment, only those data elements that contain data must appear.

3.4. MESSAGE STANDARD DESCRIPTION

This section provides the description of the UN Standard Message DESADV as defined in the 97.A Directory. Only the segments printed in bold are used in the subset defined by Shape and will be further explained in section 3.6.

3.5.1 Header section

Information to be provided in the Header section:

0010 UNH, Message header

A service segment starting and uniquely identifying a message. The message type code for the Despatch advice message is DESADV.

0020 BGM, Beginning of message

A segment for unique identification of the Despatch Advice document, by means of its name and its number.

0030 DTM, Date/time/period

Date/time/period related to the whole message. The DTM segment must be specified at least once to identify the Despatch Advice date.

0040 ALI, Additional information

A segment indicating that the message is subject to special conditions due to origin, customs preference or commercial factors.

0050 MEA, Measurements

A segment specifying the weight and volume of the consignment.

0060 MOA, Monetary amount

A segment to transmit monetary amounts for the whole despatch required by the consignee to prepare customs clearance procedures.

0070 Segment group 1: RFF-DTM

A group of segments giving references where necessary, dates relating to the whole message, e.g. contract number.

0080 RFF, Reference

A segment for referencing documents relating to the whole despatch advice message, e.g. purchase orders, delivery instructions, import/export license.

0090 DTM, Date/time/period

Date/time/period from the referred document.

0100 Segment group 2: NAD-LOC-SG3-SG4

A group of segments identifying names, addresses, locations, and required supporting documents relevant to the whole Despatch Advice.

0110 NAD, Name and address

A segment for identifying names, addresses, and their functions relevant to the whole Despatch Advice. Identification of the parties involved is recommended for the Despatch Advice message, and is to be given in the NAD segment.

It is recommended that where possible, only the coded form of the party ID should be specified, e.g. the buyer and seller are known to each other, thus only the coded ID is required. The consignee or delivery address may vary and would have to be clearly specified, preferably in structured format.

0120 LOC, Place/location identification

A segment indicating more details regarding specific places/locations related to the party specified in the NAD segment, e.g. internal site/building number.

0130 Segment group 3: RFF-DTM

A group of segments giving references relevant only to the specified party rather than the whole message.

0140 RFF, Reference

A segment for referencing documents relating to the party specified by the NAD segment.

0150 DTM, Date/time/period

A segment for specifying Date/time/period of the referred document.

0160 Segment group 4: CTA-COM

A group of segments to identify the people, functions, departments and appropriate numbers to whom communication should be directed.

- 0170 **CTA, Contact information**
A segment to identify the person, function or department to whom communication should be directed.
- 0180 **COM, Communication contact**
A segment to identify communication types and numbers for the person, function or department identified in the CTA.
- 0190 **Segment group 5: TOD-LOC-FTX**
A group of segments indicating terms of delivery.
- 0200 TOD, Terms of delivery or transport**
A segment indicating the terms of delivery and transfer for the whole despatch advice.
- 0210 **LOC, Place/location identification**
A segment indicating locations relevant to the TOD segment.
- 0220 **FTX, Free text**
Additional free text pertinent to terms of delivery. In computer-to-computer exchanges such text will normally require the receiver to process this segment manually.
- 0230 Segment group 6: TDT-PCD-SG7**
A group of segments specifying details of the mode and means of transport and date/time of departure and destination relevant to the whole despatch advice.
- 0240 TDT, Details of transport**
A segment specifying the carriage, and the mode and means of transport of the goods being despatched.
- 0250 **PCD, Percentage details**
A segment specifying the percentage of utilization of the capacity of the means of transport.
- 0260 **Segment group 7: LOC-DTM**
A group of segments giving the location and date/time information relative to the transportation.
- 0270 **LOC, Place/location identification**
A segment indicating locations relevant to the transport specified in the TDT segment.
- 0280 **DTM, Date/time/period**
A segment giving the date/time/period information of departure and/or arrival of the transported goods for the specified location.
- 0290 Segment group 8: EQD-MEA-SEL-EQA-SG9**
A group of segments providing information relative to the equipment used for the transportation of goods relevant to the whole despatch advice.
- 0300 EQD, Equipment details**
A segment to define fixed information regarding equipment used in conjunction with the whole despatch advice, and if required, to indicate responsibility for supply of the equipment.
- 0310 **MEA, Measurements**
A segment specifying physical measurements of equipment described in the EQD segment.
- 0320 SEL, Seal number**
A segment specifying a seal number connected to a specific equipment named in the EQD.
- 0330 **EQA, Attached equipment**
A segment identifying equipment either attached to the equipment described in the EQD segment above, or equipment related to that described in the EQD segment, and which is further defined in a subsequent EQD segment.
- 0340 **Segment group 9: HAN-FTX**
A group of segments providing information on hazardous goods and their handling.
- 0350 **HAN, Handling instructions**
A segment providing information on handling and notification of hazardous materials in the specified equipment.
- 0360 **FTX, Free text**
A segment with free text information in coded or clear form to give further clarification, when required, for hazardous material.

3.5.2 Detail section

Information to be provided in the Detail section:

0370 Segment group 10: CPS-FTX-SG11-SG15

A group of segments providing details of all package levels and of the individual despatched items contained in the consignment. This segment group provides the capability to give the hierarchical packing relationships. The group defines a logical top-down order structure. The lowest level package information of the hierarchy is followed by the detail product information.

0380 CPS, Consignment packing sequence

A segment identifying the sequence in which packing of the consignment occurs, e.g. boxes loaded onto a pallet.

0390 FTX, Free text

A segment with free text information in coded or clear form to give further clarification, when required, as to the packing sequence.

In computer-to-computer exchanges such text will normally require the receiver to process this segment manually.

0400 Segment group 11: PAC-MEA-QTY-SG12-SG13

A group of segments identifying packaging, physical dimensions, marks and numbers, quantities, date and time information, handling information and information about packing at this level.

0410 PAC, Package

A segment specifying the number and type of the packages/physical units and the physical type of packaging for the despatched goods.

0420 MEA, Measurements

A segment specifying physical measurements of the packages/physical units described in the PAC segment.

0430 QTY, Quantity

A segment to specify the quantity per package described in the PAC segment.

0440 Segment group 12: HAN-FTX

A group of segments providing information on hazardous goods and handling.

0450 HAN, Handling instructions

A segment providing information on required handling and notification of hazardous materials in the specified package.

0460 FTX, Free text

A segment with free text information in coded or clear form to give further clarification, when required, for hazardous materials.

0470 Segment group 13: PCI-RFF-DTM-GIR-SG14

A group of segments specifying markings, labels, and packing numbers.

0480 PCI, Package identification

A segment specifying markings and/or labels used on individual physical units (packages) described in the PAC segment.

0490 RFF, Reference

A segment for referencing the package identification e.g. master label number.

0500 DTM, Date/time/period

A segment for specifying date/time/period related to the document referenced.

0510 GIR, Related identification numbers

A segment providing set of package identification related numbers, e.g. a package label number and a KANBAN card number assigned to the same package.

0520 Segment group 14: GIN-DLM

A group of segments giving package identification numbers and, where relevant, delivery limitation information.

0530 GIN, Goods identity number

A segment providing the identity numbers of packages being despatched.

0540 DLM, Delivery limitations

A segment to identify any limitation on delivery of goods, e.g. hold until final approval by supplier.

- 0550 Segment group 15: LIN-PIA-IMD-MEA-QTY-ALI-GIN-GIR-DLM-DTM-NAD-TDT-HAN-FTX-MOA-SG16-SG17-SG18-SG19-SG20-SG23**
 A group of segments providing details of the individual despatched items.
- 0560 LIN, Line item**
 A segment identifying the product being despatched. All other segments in the detail section following the LIN segment refer to that line item.
- 0570 PIA, Additional product id**
 A segment providing additional product identification.
- 0580 IMD, Item description**
 A segment for describing the product being despatched. This segment should be used for products that cannot be identified by a product code or article number.
- 0590 MEA, Measurements**
 A segment specifying physical measurements of the despatched item in original or unpacked form.
- 0600 QTY, Quantity**
 A segment to give quantity information concerning the product.
- 0610 ALI, Additional information**
 A segment indicating that the line item is subject to special conditions due to origin, customs preference, or commercial factors.
- 0620 GIN, Goods identity number**
 A segment providing identity numbers of the goods being despatched, e.g. serial numbers for assembled equipment.
- 0630 GIR, Related identification numbers**
 A segment providing sets of related identification numbers for a line item, e.g. engine number, chassis number and transmission number for a vehicle.
- 0640 DLM, Delivery limitations**
 A segment to identify any limitation on delivery of goods e.g. hold until final approval by supplier.
- 0650 DTM, Date/time/period**
 A segment providing date, time information related to the line item, e.g. production date.
- 0660 NAD, Name and address**
A segment for identifying names and addresses and their functions relevant to the item, e.g. manufacturer.
- 0670 TDT, Details of transport**
 A segment specifying the carriage, and the mode and means of transport of the goods being despatched, e.g. shipment/consignment number, shipping method, carrier.
- 0680 HAN, Handling instructions**
 A segment providing information on the handling and notification of hazardous materials.
- 0690 FTX, Free text**
 A segment with free text information in coded or clear form to give further clarification, when required, to the line item. In computer-to-computer exchanges such text will normally require the receiver to process this segment manually.
- 0700 MOA, Monetary amount**
 A segment giving monetary amounts required by the consignee to undertake customs clearance procedures.
- 0710 Segment group 16: RFF-NAD-CTA-DTM**
 A group of segments to give reference numbers and dates.
- 0720 RFF, Reference**
 A segment identifying documents related to the line item.
- 0730 NAD, Name and address**
 A segment for identifying names and addresses and their functions relevant to the originator of the document in the RFF segment.
- 0740 CTA, Contact information**
 A segment to identify the office, branch or department to whom communication relevant to the document should be directed.
- 0750 DTM, Date/time/period**
 A segment for date/time/period relative to the referred document.
- 0760 Segment group 17: DGS-QTY-FTX**

A group of segments giving information about dangerous goods.

0770 DGS, Dangerous goods

A segment to indicate the class of dangerous goods.

0780 QTY, Quantity

A segment to specify quantity of the given dangerous goods.

0790 FTX, Free text

A segment to describe dangerous goods.

0800 Segment group 18: LOC-NAD-DTM-QTY

A group of segments giving location information and where relevant, additional addresses, date and time, and quantities.

0810 LOC, Place/location identification

A segment identifying a specific location to which products will be delivered.

0820 NAD, Name and address

A segment for identifying names and addresses and their functions relevant to the delivery point. It is recommended that where possible only the coded form of the party ID should be specified, e.g. the buyer and seller are known to each other, thus only the coded ID is required. The consignee or delivery address may vary and would have to be clearly specified, preferably in structured format.

0830 DTM, Date/time/period

A segment providing date/time information relevant for delivery to the specific location.

0840 QTY, Quantity

A segment to specify quantity for the given location.

0850 Segment group 19: SGP-QTY

A group of segments indicating the split placement of packages or unpacked goods into equipment.

0860 SGP, Split goods placement

A segment to specify the placement of goods in relation to one equipment. If goods are unpacked, their quantity would be given in the following QTY segment.

0870 QTY, Quantity

A segment to specify the quantity of unpacked goods being placed in a specific equipment.

0880 Segment group 20: PCI-DTM-MEA-QTY-SG21-SG22

A group of segments identifying one specific package or a number of packages, their marks and numbers, measurements, quantities, date and time information and handling instructions.

0890 PCI, Package identification

A segment specifying marking and labels used on individual packages or a range of packages.

0900 DTM, Date/time/period

A segment giving the date/time details related to the goods within the packages e.g. expiration date.

0910 MEA, Measurements

A segment specifying physical measurements of packages.

0920 QTY, Quantity

A segment to specify quantity per package.

0930 Segment group 21: GIN-DLM

A group of segments giving package identification numbers and, where relevant, delivery limitation information.

0940 GIN, Goods identity number

A segment providing identification numbers being applied to the packages despatched.

0950 DLM, Delivery limitations

A segment to identify any limitation on delivery of goods e.g. hold until final approval by supplier.

0960 Segment group 22: HAN-FTX-GIN

A group of segment providing information on hazardous materials and handling.

0970 HAN, Handling instructions

A segment providing information on handling and notification of hazardous materials.

0980 FTX, Free text

A segment with free text information in coded or clear form to give further clarification, when required, for hazardous materials.

- 0990 GIN, Goods identity number
A segment providing identification numbers being applied to the packages containing hazardous goods.
- 1000 Segment group 23: QVR-DTM
A group of segments identifying quantity variances, the reason for the variance, and, when relevant, date and time information.
- 1010 QVR, Quantity variances
A segment identifying a quantity variance and the reason for the variance.
- 1020 DTM, Date/time/period
A segment to give date and time information relative to the quantity variances, e.g. proposed delivery date on the back order.

3.5.3 Summary section

Information to be provided in the Summary section:

- 1030 CNT, Control total
A segment by which control totals may be provided by sender for checking by the receiver.
- 1040 UNT, Message trailer**
A service segment ending a message, giving the total number of segments in the message and the control reference number of the message.

3.5. MESSAGE STRUCTURE

The message structure illustrates how the segments can be repeated in the Despatch Advice message to accommodate the requirements identified by Shape.

0010.UNH	Start of Despatch Advice Message
0020.BGM	Message identification
0030-1.DTM	Message generation date/time
0030-2.DTM	Despatch date/time
0030-3.DTM	Estimated arrival date/time
0050-1.MEA	Shipment gross weight
0050-2.MEA	Shipment net weight
0080.RFF	Waybill number
0110-1.NAD	Planning schedule/material release issuer (buyer)
0110-2.NAD	Ship to identification
0120.[NAD].LOC	Delivery dock
0110-3.NAD	Supplier identification
0110-5.NAD	Ordered by
0240.TDT	Transport details
0300.EQD	Equipment details
0320.[EQD].SEL	Seal Number
0370-1.CPS	Detail trigger segment 1
0410.[CPS].PAC	Package details for part number 1
0430.[CPS.PAC].QTY	Identify quantity per pack
0480.[CPS.PAC].PCI	Trigger segment for package identification
0490.[CPS.PAC.PCI].RFF	Package related reference number
0510.[CPS.PAC.PCI].GIR	Package related identification number(s)
0560.[CPS].LIN	Part number 1
0570.[CPS.LIN].PIA	Record keeping year / Engineering change level
0580.[CPS.LIN].IMD	Item description
0600.[CPS.LIN].QTY	Despatched quantity for part number 1
0610.[CPS.LIN].ALI	<i>Not used with Shape</i>
0690.[CPS.LIN].FTX	Free text information
0660.[CPS.LIN].NAD	Manufacturer Duns#
0720.[CPS.LIN].RFF	Purchase order for part number 1
0890.[CPS.LIN].PCI	Markings - only if part number is primary metal
0910-1.[CPS.LIN.PCI].MEA	Gross weight - only if part number is primary metal
0910-2.[CPS.LIN.PCI].MEA	Length - only if part number is primary metal
0910-3.[CPS.LIN.PCI].MEA	Width - only if part number is primary metal
0910-4.[CPS.LIN.PCI].MEA	Thickness - only if part number is primary metal
0920.[CPS.LIN.PCI].QTY	Quantity - only if part number is primary metal

		Heat code or Lot number - only for primary metal
0940.[CPS.LIN.PCI].GIN		Detail trigger segment 2
0370-2.CPS		Package details for part number 2
0410.[CPS].PAC		Not used with Shape
0430.[CPS.PAC].QTY		Part number 2
0560.[CPS].LIN		Record keeping year / Engineering Change level
0570.[CPS.LIN].PIA		Despatched quantity for part number 2
0600.[CPS.LIN].QTY		<i>Not used with Shape</i>
0610.[CPS.LIN].ALI		Manufacturer Duns#
0660.[CPS.LIN].NAD		Purchase order for part number 2
0720.[CPS.LIN].RFF		Detail trigger segment 3
0370-3.CPS		Details for part number 3
...		Detail trigger segment N
0370-n.CPS		Package component 1 details
0410.[CPS].PAC		...
...		End of message
1040.UNT		

3.6. SERVICE SEGMENTS DESCRIPTION

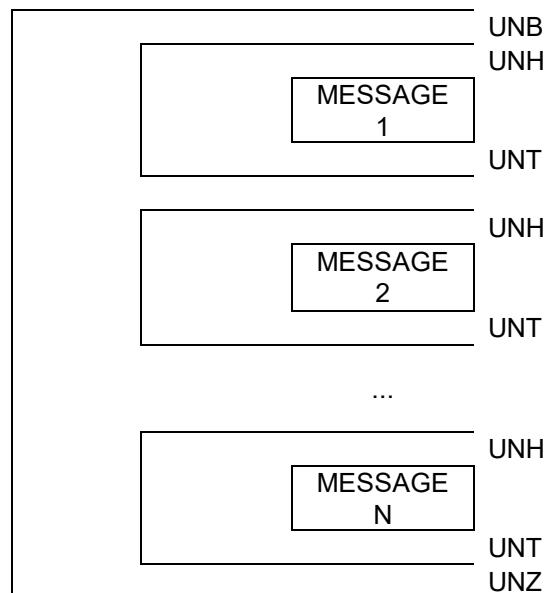

Following service segments are as defined by UN/EDIFACT and presented under ISO 9735.

The UNB, UNH, UNT and UNZ segments are the envelope of any message, enclosing all the data that is being transmitted.

The UNB (Interchange header) and UNZ (Interchange trailer) segments mark respectively the beginning and the end of an interchange thereby providing a unique interchange control reference.

Within the interchange the UNH (message header) and UNT (Message trailer) segments uniquely begin and end the various messages contained in an interchange.

**EXAMPLE OF AN
INTERCHANGE STRUCTURE**

NOTE:

All data elements marked "M" for Mandatory in the "ST" field of the Shape implementation must be included in the message. Missing or incorrect entries will result in the rejection of the message.

0000 UNB - INTERCHANGE HEADER

Segment Group: none Level: 0
 EDIFACT status: mandatory Shape status: mandatory
 Maximum use: 1 per interchange Shape occurrences: 1 per interchange
 Function Service segment providing the unique identification of an interchange. It allows the identification of the sender and the receiver of the interchange, gives date and time of preparation as well as the interchange control reference and the application reference.
 Shape interchange: see remarks.

Example: UNB+UNOA:2+QQQ:ZZ+DPH:ZZ+030325:0200+233++DESADV'
 A B C D E F G H I

REF	TAG	EDIFACT STANDARD DEFINITION				SHAPE IMPLEMENTATION			REMARKS
		NAME	ST	FT	SP	ST	FT		
A	S001	SYNTAX IDENTIFIER	M			M			“UNOA”. Indication of the syntax version used for this message.
	0001	Syntax identifier	M	a4	:	M	a4		
B	0002	Syntax version number	M	n1	+	M	n1		Communication Code/Mailbox number of the party originating the message. “ZZ” mutually defined “01” DUNS number
C	S002	INTERCHANGE SENDER	M			M			Communication Code/Mailbox number of the party receiving the message. “ZZ” mutually defined “01” DUNS number
	0004	Sender identification	M	an..35	:	M	an..35		
D	0007	Identification code qualifier	C	an..4	:	M	an..02		“ZZ” mutually defined “01” DUNS number
	0008	Address for Reverse Routing	C	an..14	+				
E	S003	INTERCHANGE RECIPIENT	M			M			Communication Code/Mailbox number of the party receiving the message. “ZZ” mutually defined “01” DUNS number

	0035	TEST INDICATOR	C	n1	'	C	n1	Used for Test only	

Note: Century is not used in tag 0017, 0019

0010 UNH - MESSAGE HEADER

Segment group: none
 EDIFACT status: mandatory.
 Maximum use: 1 per message.
 Function: service segment starting and uniquely identifying a message. The message type code for the Despatch Advice message is DESADV.
 Shape interchange: see remarks.
 Example: **UNH+4+DESADV:D:97A:UN'**
 A B C D E

EDIFACT STANDARD DEFINITION							SHAPE IMPLEMENTATION		
REF	TAG	NAME	ST	FT	SP	ST	FT	REMARKS	
A	0062	MESSAGE REFERENCE NUMBER	M	an..14	+	M	an..14	Message Control number assigned by the sender to the message.	
B	S009	MESSAGE IDENTIFIER	M			M			
B	0065	Message type	M	an..6	:	M	an..6	"DESADV"	
C	0052	Message version number	M	an..3	:	M	an..3	"D"	
D	0054	Message release number	M	an..3	:	M	an..3	"97A"	
E	0051	Controlling agency	M	an..2	:	M	an..2	"UN"	
	0057	Association assigned code	C	an..6	+				
	0068	COMMON ACCESS REFERENCE	C	an..35	+				
S010	STATUS OF TRANSFER		C						
0070	Sequence of transfer		M	n..2	:				
0073	First and last transfer		C	a1	:				

COMMENTS

The Message Reference number is structured as follows:

First message:	1
Second message:	2
max.:	9999

1040 UNT - MESSAGE TRAILER

Segment group: none
 EDIFACT status: mandatory
 Maximum use: 1 per message
 Function: service segment ending a message, giving the total number of segments in the message and the control reference number of the message.
 Shape interchange:

Example: **UNT+31+4'**
 A B

EDIFACT STANDARD DEFINITION							SHAPE IMPLEMENTATION		
REF	TAG	NAME	ST	FT	SP	ST	FT	REMARKS	
A	0074	NUMBER OF SEGMENTS IN THE MESSAGE	M	n..6		M	n..6	Control count of the number of segments in the message, including UNH and UNT.	
B	0062	MESSAGE REFERENCE NUMBER	M	an..14		M	an..14	Number must be identical to UNH - tag 0062	

1050 UNZ - INTERCHANGE TRAILER

Segment Group: none
 EDIFACT status: mandatory
 Maximum use: 1
 Function: service segment ending an interchange and giving the number of messages contained in the interchange as well as the Interchange Control Reference number.
 Shape interchange:
 Example: UNZ+1+233'
 A B

REF	TAG	EDIFACT STANDARD DEFINITION					SHAPE IMPLEMENTATION			REMARKS	
		NAME	ST	FT	SP	ST	FT				
A	0036	INTERCHANGE CONTROL COUNT	M	n..6	+	M	n..6	Number of messages in an interchange.			
B	0020	INTERCHANGE CONTROL REFERENCE	M	an..14	'	M	an..14	Value must be the same as 0020 - Interchange Control Reference in UNB.			

3.7. DATA SEGMENTS DESCRIPTION

This part includes only the segments defined in the standard and used in the subset exchanged between the Trading Partners and Shape. The segments are described in the same sequence as they appear in the message.

The EDIFACT DESADV segments that are not used in the subset used by Shape are included in alphabetical sequence under item 3.9.

NOTE: All data elements marked "M" for Mandatory in the "ST" field of the Shape implementation must be included in the message. Missing or incorrect entries will result in the rejection of the message.

0020 BGM - BEGINNING OF MESSAGE

Segment group: none Level: 1
EDIFACT status: mandatory Shape status: mandatory
Maximum use: 1 per message Shape occurrences: 1 per message
Function: segment for unique identification of the Despatch Advice document, by means of its name and its number.

Note: Use only alpha and /or numeric characters in the BGM segment. Special characters or symbols may cause failure.

Example: **BGM++123456+9'** Limit to 10 characters
A B

EDIFACT STANDARD DEFINITION							SHAPE IMPLEMENTATION		
REF	TAG	NAME	ST	FT	SP	ST	FT	REMARKS	
A	C002	DOCUMENT/MESSAGE NAME	C						
	1001	Document/message name, coded	C	an..3	:				
	1131	Code list qualifier	C	an..3	:				
	3055	Code list responsible agency, coded	C	an..3	:				
	1000	Document/message name	C	an..35	+				
	C106	DOCUMENT/MESSAGE IDENTIFICATION	C			M			
	1004	Document/message number	C	an..35	:	M	an..30	A unique control number, commonly called a Shipment Identification Number (SID), assigned by the original shipper to identify a specific shipment. This unique control number cannot be repeated. This number must be referenced on both the packing list and the bill of lading as the Shipment Identification Number (SID). The SID number will be used by Shape as the reference number on the payment remittance to the supplier.	
	1056	Version	C	an..9	:				
	1060	Revision number	C	an..6	+				
B	1225	MESSAGE FUNCTION, CODED	C	an..3	+	M	an..3	Function of the message. For code values see below. Note: "9" is currently the only code which Shape will process.	
	4343	RESPONSE TYPE, CODED	C	an..3	:				

CODE VALUES

1225 - Message function, coded

- | | |
|---|---|
| 1 | Cancellation
Message canceling a previous transmission for a given transaction. The issuer's subsequent transmission of an SID, canceling all data previously transmitted under that SID (1004). |
| 2 | Addition
Message containing items (e.g. line items, goods items, Customs items, equipment items) to be added to a previously sent message. The issuer's subsequent transmission of an SID, adding part specific data not previously transmitted under that SID (1004). |
| 4 | Change
Message containing items (e.g. line items, goods items, Customs items, equipment items) to be changed in a previously sent message. The issuer's subsequent transmission of an SID, changing data previously transmitted under that SID (1004). |
| 9 | Original
Initial transmission related to a given transaction. The issuer's first transmission of a message for a particular SID (1004). |

Note: Use Message function, coded (1225) value as 9.

0030

DTM - DATE/TIME/PERIOD

Segment group:	none	Level:	1
EDIFACT status:	mandatory	Shape status:	mandatory (see comments)
Maximum use:	10 per message at level 1	Shape occurrences:	max. 3 per message
Function:	segment specifying the date/time/period related to the whole message. The DTM segment must be specified at least once to identify the Despatch Advice date.		
Shape interchange:	there may be max. 3 occurrences of DTM in position 0030: to specify the message issue date, to specify the despatch date and/or time and to specify the estimated arrival date/time. The 2 first occurrences are mandatory in the messages exchanged with Shape.		
Example:	DTM+137: 200303250200:203' DTM+11: 200303250200:203' DTM+132: 200303260200:203'	Document generation, <i>mandatory</i> Despatch date/time, <i>mandatory</i> Estimated arrival date/time, <i>optional</i>	
	A B C		

EDIFACT STANDARD DEFINITION				SHAPE IMPLEMENTATION				
REF	TAG	NAME	ST	FT	SP	ST	FT	REMARKS

Document generation date.**MANDATORY - must be transmitted.**

A	C507	DATE/TIME/PERIOD	M	M	M	M		
A	2005	Date/time/period qualifier	M	an..3	:	M	an..3	"137" = Document/message date/time.
B	2380	Date/time/period	C	an..35	:	M	an..35	Date/time when the document is issued.
C	2379	Date/time/period format qualifier	C	an..3	"	M	an..3	"203" = CCYYMMDDHHMM.

Despatch date/time.**MANDATORY - must be transmitted.**

A	C507	DATE/TIME/PERIOD	M	M	M	M		
A	2005	Date/time/period qualifier	M	an..3	:	M	an..3	"11" = Despatch date and or time.
B	2380	Date/time/period	C	an..35	:	M	an..35	Date/time on which the goods are actually despatched or shipped.
C	2379	Date/time/period format qualifier	C	an..3	'	M	an..3	"203" = CCYYMMDDHHMM.

Estimated arrival date/time.**Optional - may be transmitted.**

A	C507	DATE/TIME/PERIOD	M	M	M	M		
A	2005	Date/time/period qualifier	M	an..3	:	M	an..3	"132" = Arrival date/time, estimated.
B	2380	Date/time/period	C	an..35	:	M	an..35	Date/time when the goods are expected to arrive at the place of destination.
C	2379	Date/time/period format qualifier	C	an..3	'	M	an..3	"203" = CCYYMMDDHHMM.

0050 MEA - MEASUREMENTS

Segment group: none
 EDIFACT status: conditional
 Maximum use: 5 per message at level 1
 Function: segment specifying the weight and volume of the consignment.
 Shape interchange: there need to be 3 occurrences of MEA in position 0050 specifying the gross weight and the net weight of the shipment and the total number of lading units.
 Example: **MEA+AAX+G+LBR:200'** Gross Weight, *mandatory*
MEA+AAX+N+LBR:200' Net weight, *mandatory*
MEA+AAX+SQ+C62:44' Ship quantity, *mandatory*

	6314	Measurement value	C	an..18	:	M	an..18	Quantity
	REST OF SEGMENT NOT USED.							

Segment group 1: RFF-DTM

Segment group: 1
 EDIFACT status: conditional
 Maximum use: 10 per message at level 1
 Function: group of segments giving references where necessary, their dates relating to the whole message, e.g. contract number.
 Shape interchange: only RFF is required in segment group 1.

0080 RFF - REFERENCE

Segment group: 1 [RFF]
 EDIFACT status: mandatory if segment group 1 is used
 Maximum use: 1 per segment group 1 (max. 10)
 Function: segment for referencing documents relating to the whole despatch advice message, e.g. purchase orders, delivery instructions, import/export license.

Shape interchange: **At least one iteration is mandatory.**

If Carrier's reference number is known, send RFF+CN segment. To clarify the difference between carrier reference number and integrated logistics cross-reference number, the carrier reference number is the PRO number issued by the actual carrier of the goods and can be used in traditional EDI and Ship Direct scenarios. The integrated logistics cross-reference number is issued by the logistics provider coordinating the goods movement. The integrated logistics cross-reference number is only used in Ship Direct scenarios.

Example: **RFF+CN:35'** Carrier Reference number
RFF+MB:123456' Master Bill of Lading

REF	TAG	EDIFACT STANDARD DEFINITION					SHAPE IMPLEMENTATION		
		A	B	NAME	ST	FT	SP	ST	FT

Carrier's reference number

Conditional: Transmit if carrier is known

A	C506	REFERENCE	M			M			
A	1153	Reference qualifier	M	an..3	:	M	an..3		"CN" = Carrier's reference number.
B	1154	Reference number	C	an..35	:	M	an..35		Number as referenced in 1153 above.
	1156	Line number	C	an..6	:				
	4000	Reference version number	C	an..35	:				

Master bill of lading number

Mandatory: Must be transmitted

A	C506	REFERENCE	M			M			
A	1153	Reference qualifier	M	an..3	:	M	an..3		"MB" = Master bill of lading number.
B	1154	Reference number	C	an..35	:	M	an..35		Number as referenced in 1153 above.
	1156	Line number	C	an..6	:				
	4000	Reference version number	C	an..35	:				

Segment group 2: NAD-LOC-SG3-SG4

Segment group: 2
 EDIFACT status: conditional
 Maximum use: 10 per message at level 1
 Function: group of segments identifying names, addresses, locations, and required supporting documents relevant to the whole Despatch Advice.
 Shape interchange: see segment description.

Level: 1
 Shape status: mandatory
 Shape occurrences: maximum 5 per message

0110 NAD - NAME AND ADDRESS

Segment group: 02 [NAD] Level: 1
 EDIFACT status: mandatory if segment group 02 is used Shape status: mandatory
 Maximum use: 1 per segment group 02 (max. 10) Shape occurrences: 1 per segment group 2
 Function: segment for identifying names, addresses, and their functions relevant to the whole Despatch Advice.
 Shape interchange: the message may contain max. 5 NAD segments as detailed below. Shape always requires the transmission of the first 3 occurrences detailed below. If the ship from location is different from the supplier location then the 4th occurrence is also mandatory. The 5th occurrence is only to be transmitted if this information was also included in the DELFOR previously transmitted by Shape.

Example: **NAD+MI+623700994::16'** Material issuer, *mandatory*
NAD+ST+H301::92' Ship To, *mandatory*
NAD+SU+999123456::16' Supplier Mfg. Plant DUNS # *mandatory*
NAD+SF+999112233::16' Ship From, *conditional*
NAD+OB+HA02::92++++++DE' Ordered by, *conditional*
 A B C D mandatory for ship direct

AAI General Information
ACD Reason

Segment group 6: TDT-PCD-SG7

Segment group: 6
 EDIFACT status: conditional
 Maximum use: 10 per message at level 1
 Function: group of segments specifying details of the mode and means of transport and date/time of departure and destination relevant to the whole despatch advice.
 Shape interchange: only segment TDT is used in segment group 6.

Level: 1
 Shape status: mandatory
 Shape occurrences: max. 2 per message

0240 TDT - DETAILS OF TRANSPORT

Segment group: 6 [TDT]
 EDIFACT status: mandatory if segment group 6 is used
 Maximum use: 1 per segment group 6 (max. 10)
 Function: segment specifying the carriage, and the mode and means of transport of the goods being despatched.
 Shape interchange:

Example: **TDT+25++LT++HMES::182'**

182 Standard Carrier Alpha Code (SCAC)

8051 - Transport stage qualifier

- 12 At departure
Transport by which goods are moved from the place of departure. Pick-up SCAC.
25 Delivery carrier all transport.
Carrier responsible from the point of origin to the final delivery destination.

8067 - Mode of transport, coded

General Codes to be used for Shape, more detailed Codes may need to be implemented on request of Shape Implementation Plant:

A	Air
AC	Air Charter
AE	Air Express
C	Consolidation
D	Parcel Post
E	Expedited Truck
FA	Air Freight Forwarder
G	Piggyback
GS	Progressive pick-up (milk run)
H	Customer Pick-up
J	Motor
LT	Less than trailer load
R	Rail
SE	Sea/Air
SR	Supplier Truck
SS	Steamship
T	Best way
TC	(Taxi) Cab
U	Private Parcel Service
VE	Vessel, Ocean
W	Inland Waterway

Segment group 8: EQD-MEA-SEL-EQA-SG9

Segment group: 8 Level: 1
 EDIFACT status: conditional Shape status: mandatory
 Maximum use: 10 per message at level 1 Shape occurrences: max. 10 per message
 Function: group of segments providing information relative to the equipment used for the transportation of goods relevant to the whole despatch advice.
 Shape interchange: only segments EQD and SEL are used in segment group 8.

0300 EQD - EQUIPMENT DETAILS

Segment group: 8 [EQD] Level: 1
 EDIFACT status: mandatory if segment group 08 is used Shape status: mandatory
 Maximum use: 1 per segment group 8 (max. 10) Shape occurrences: 1 per segment group 8
 Function: segment to define fixed information regarding equipment used in conjunction with the whole despatch advice, and if required, to indicate responsibility for supply of the equipment.
 Shape interchange: see remarks.

Example: EQD+TE+TRAILER 001'

CODE VALUES

8053 - Equipment qualifier

- CN** Container
 Equipment item as defined by ISO for transport. It must be of: A) permanent character, strong enough for repeated use; B) designed to facilitate the carriage of goods, by one or more modes of transport, without intermediate reloading; C) fitted with devices for its ready handling, particularly.
- RR** Railcar
 Registered identification number of railway wagon
- TE** Trailer
 A vehicle without motive power, designed for the carriage of cargo and to be towed by a motor vehicle.

Segment group 10: CPS-FTX-SG11-SG15

Segment group: 10 [CPS]
 EDIFACT status: conditional
 Maximum use: 9999 per message
 Function: group of segments providing details of all package levels and of the individual despatched items contained in the consignment. This segment group provides the capability to give the hierarchical packing relationships. The group defines a logical top-down order structure. The lowest level package information of the hierarchy is followed by the detail product information.
 Shape interchange: only segment CPS is used in segment group 10. Segment group 10 may be used as detailed below:

0370.CPS	Level: 1
0410.[CPS].PAC	Shape status: mandatory
0430.[CPS.PAC].QTY	Shape occurrences: max 499 occurrences per msg.
0560.[CPS].LIN	
0600.[CPS.LIN].QTY	
0370.CPS	Inner level (7075 = 1)
0410.[CPS].PAC	Inner level package for part number 1
0430.[CPS.PAC].QTY	Quantity per pack for part number 1
0560.[CPS].LIN	Part number 1
0600.[CPS.LIN].QTY	Part number 1 quantity
0370.CPS	Inner level (7075 = 1)
0410.[CPS].PAC	Inner level package for part number 2
0430.[CPS.PAC].QTY	Quantity per pack for part number 2
0560.[CPS].LIN	Part number 2
0600.[CPS.LIN].QTY	Part number 2 quantity
0370.CPS	Inner level (7075 = 1)
0410.[CPS].PAC	Inner level package for part number 3
0430.[CPS.PAC].QTY	Quantity per pack for part number 3
0560.[CPS].LIN	Part number 3
0600.[CPS.LIN].QTY	Part number 3 quantity
0370.CPS	Inner level (7075 = 1)
0410.[CPS].PAC	Inner level package for part number 4
0430.[CPS.PAC].QTY	Quantity per pack for part number 4
0560.[CPS].LIN	Part number 4
...	...
0370.CPS	Outer level (7075 = 3)
0410.[CPS].PAC	Outer level package, e.g. top of pallet
0370.CPS	Outer level (7075 = 3)
0410.[CPS].PAC	Outer level package, e.g. pallet

DESCRIPTION OF CPS FOR INNER PACKING

0380**CPS - CONSIGNMENT PACKING SEQUENCE****(7075 = 1)**

Segment group: 10 [CPS] Level: 1
 EDIFACT status: mandatory if segment group 10 is used Shape status: mandatory
 Maximum use: 1 per segment group 10 (max.9999) Shape occurrences: max 499 occurrences per msg.
 Function: segment identifying the sequence in which packing of the consignment occurs, e.g. boxes loaded onto a pallet.
 Shape interchange: see remarks.
 Example: **CPS+1++4'**
 A B

EDIFACT STANDARD DEFINITION									SHAPE IMPLEMENTATION	
REF	TAG	NAME	ST	FT	SP	ST	FT		REMARKS	
A	7164	HIERARCHICAL ID. NUMBER	M	an..12	+	M	an..12	A unique number assigned by the sender to identify a level within a hierarchical structure. Begins with the number 1 and increments by one for each occurrence within the message. Numbers are not to be repeated within the same message.		
	7166	HIERARCHICAL PARENT ID.	C	an..12	+					
B	7075	PACKAGING LEVEL, CODED	C	an..3	'	M	an..3	For code value see below.		

CODE VALUES

7075 - Packaging Level, Coded

- 1 Inner
Level of packing, if it exists, that is immediately subordinate to the intermediate packaging level.
- 3 Outer
For packed merchandise, outermost level of packaging for a shipment
Description of CPS for outer package level is provided on page 52 in line with the message structure.
- 4 There is no specifiable level of packaging: packaging is inner and outer level as well
Note: Use code 4 for Packaging level, Coded – 7075

Segment group 11: PAC-MEA-QTY-SG12-SG13

Segment group: 11 [CPS.QTY.SG11] Level: 2
 EDIFACT status: mandatory Shape status: mandatory
 Maximum use: 999 per CPS in segment group 10 Shape occurrences: 1 per segment group 10
 Function: group of segments identifying packaging, physical dimensions, marks and numbers, quantities, date and time information, handling information and information about packing at this level.
 Shape interchange: only the segments PAC and QTY are used in segment group 11.

0410 PAC - PACKAGE

Segment group: 11 [CPS.PAC] Level: 2
 EDIFACT status: mandatory if segment group 11 is used Shape status: mandatory
 Maximum use: 1 per segment group 11 (max. 9999 per CPS) Shape occurrences: 1 per segment group 11
 Function: segment specifying the number and type of the packages/physical units and the physical type of packaging for the despatched goods.
 Shape interchange:

Example: **PAC+8++PALLET'**
A B

0600 QTY - QUANTITY

Segment group: 15 [CPS.LIN.QTY]
 EDIFACT status: conditional
 Maximum use: 10 per preceding LIN
 Function: segment to give quantity information concerning the product.
 Shape interchange: see remarks.

Example: QTY+3:28800:C62'
 QTY+12:14400:C62'
 A B C

REF	TAG	EDIFACT STANDARD DEFINITION				SHAPE IMPLEMENTATION			
		NAME	ST	FT	SP	ST	FT	REMARKS	

Cumulative quantity shipped since creation of purchase order Mandatory

A	C186 6063	QUANTITY DETAILS Quantity qualifier	M M	an..3 n..15	:	M M	an..3 n..12	“3” = Cumulative quantity. Cumulative quantity of the part identified in the preceding LIN, shipped since creation of purchase order by this supplier to this plant. (3 decimal positions allowed)	
B	6060	Quantity	M		:	M			
C	6411	Measure unit qualifier	C	an..3	,	C	an..3	For code value see UN/ECE Recommendation no. 20.	

Despatch quantity

Mandatory

A	C186 6063	QUANTITY DETAILS Quantity qualifier	M M	an..3 n..15	:	M M	an..3 n..12	“12” = Despatch quantity Actual quantity as defined in 6063 above. (3 decimal positions allowed)	
B	6060	Quantity	M		:	M			
C	6411	Measure unit qualifier	C	an..3	,	C	an..3	For code value see UN/ECE Recommendation no. 20. (This must be the same Unit of Measure provided on the corresponding shipment authorization document.)	

Note: Cumulative quantities are from the start of the PO. They are unique to a combination of PO/Supplier/Part number/Revision.

Segment group 16: RFF-NAD-CTA-DTM

Segment group: 16 [CPS.LIN.SG16] Level: 3
 EDIFACT status: conditional Shape status: mandatory
 Maximum use: 99 per LIN in segment group 15 Shape occurrences: 1 per segment group 15
 Function: group of segments to give reference numbers and dates.
 Shape interchange: only RFF is used in segment group 16.

0720 RFF - REFERENCE

Segment group: 16 [SEQ.LIN.RFF] Level: 3
 EDIFACT status: mandatory if segment group 16 is used Shape status: mandatory
 Maximum use: 1 per segment group 16 (max.99 per LIN) Shape occurrences: 2 per segment group 16
 Function: segment identifying documents related to the line item.
 Shape interchange: see remarks.

Example: RFF+ON:0550012345'

4. MESSAGE INFORMATION

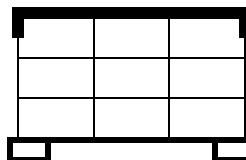

This section contains additional information related to the EDIFACT DESADV D97.A message.

4.1. PACKAGING INFORMATION

The following examples illustrate some situations that could occur when using master and mixed units.

EXAMPLE 1: one part number on one pallet.

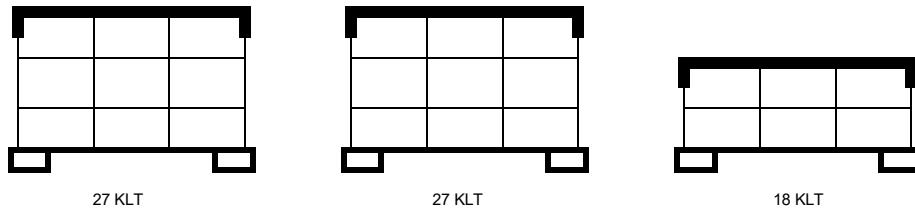

Situation: 2700 pieces of part number 123456-20 are despatched in 27 containers type CTN90. The 27 containers are loaded on one pallet.

CPS+1++1'	1 st CPS segment
PAC+27+CTN90'	Container details
QTY+52:100:C62'	Quantity per container
PCI+16'	Package information
RFF+AAT:ABCM001'	Master unit serial number
GIR+3+ABC00001:AW'	Bar Code label Serial number
<i>Repeat GIR segments for all 27 containers using unique serial numbers matching the labels</i>	
LIN+1++123456-20:IN+02:EC'	Part number 1
QTY+12:2700:C62'	Despatched quantity part number 1
<i>Despatched quantity = Number of containers * quantity per container</i>	

EXAMPLE 2: one part number on several pallets.

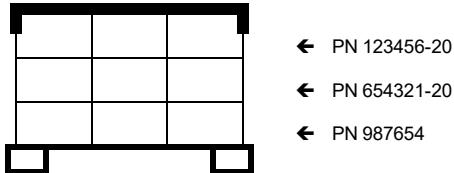

Situation: 7200 pieces of part number 123456-20 are despatched in 72 containers type CTN90. The 72 containers are loaded on 3 pallets.

CPS+1++4'	1st CPS segment
PAC+27+CTN90'	KLT details

4.2. SEGMENTS REPERTORY

The following tables show all the data segments defined for the EDIFACT DESADV D97.A message, used as basis for the Shape ASN/Despatch Advice message.

4.2.1. Segments in alphabetical sequence

<u>Segment name</u>	<u>Tag</u>
Additional information	ALI
Additional product id	PIA
Attached equipment	EQA
Beginning of message	BGM
Communication contact	COM
Consignment packing sequence	CPS
Contact information	CTA
Control total	CNT
Dangerous goods	DGS
Date/time/period	DTM
Delivery limitations	DLM
Details of transport	TDT
Equipment details	EQD
Free text	FTX
Goods identity number	GIN
Handling instructions	HAN
Item description	IMD
Line item	LIN
Measurements	MEA
Monetary amount	MOA
Name and address	NAD
Package	PAC
Package identification	PCI
Percentage details	PCD
Place/location identification	LOC
Quantity	QTY
Quantity variances	QVR
Reference	RFF
Related identification numbers	GIR
Seal number	SEL
Split goods placement	SGP
Terms of delivery or transport	TOD

4.2.2. Segments in segment tag sequence

<u>Tag</u>	<u>Segment name</u>
ALI	Additional information
BGM	Beginning of message
CNT	Control total
COM	Communication contact
CPS	Consignment packing sequence
CTA	Contact information
DGS	Dangerous goods
DLM	Delivery limitations
DTM	Date/time/period
EQA	Attached equipment
EQD	Equipment details
FTX	Free text
GIN	Goods identity number
GIR	Related identification numbers
HAN	Handling instructions
IMD	Item description

Tag Segment name

LIN	Line item
LOC	Place/location identification
MEA	Measurements
MOA	Monetary amount
NAD	Name and address
PAC	Package
PCD	Percentage details
PCI	Package identification
PIA	Additional product id
QTY	Quantity
QVR	Quantity variances
RFF	Reference
SEL	Seal number
SGP	Split goods placement
TDT	Details of transport
TOD	Terms of delivery or transport

4.3. DATA ELEMENTS REPERTORY

The following listings show all the data elements defined for the EDIFACT DESADV D97.A message, used as basis for the Shape Delivery Instruction message.

4.3.1. Service data elements in alphabetical sequence

List of data elements defined for the UNB, UNH, UNT and UNZ service segments.

<u>Data element name</u>	<u>Tag</u>
Acknowledgment Request.....	0031
Address for Reverse Routing.....	0008
Application Reference.....	0026
Association Assigned Code.....	0057
Common Access Reference.....	0068
Communications Agreement ID.....	0032
Controlling Agency.....	0051
Date of Preparation.....	0017
First / Last Message Indicator.....	0072
Identification Code Qualifier.....	0007
Interchange Control Count.....	0036
Interchange Control Reference.....	0020
Message Reference Number.....	0062
Message Type Identifier.....	0065
Message Type Release Number	0054
Message Type Version Number	0052
Number of Segments in Message	0074
Processing Priority Code	0029
Recipient Identification.....	0010
Recipient's Reference / Password.....	0022
Recipient's Reference / Password Qualifier	0025
Routing Address	0014
Sender Identification	0004
<u>Data element name</u>	<u>Tag</u>
Sequence Message Transfer Number.....	0070
Syntax Identifier.....	0001

Syntax Version Number	0002
Test Indicator	0035
Time of Preparation	0019

4.3.2. Service data elements in tag sequence

<u>Tag</u>	<u>Data element name</u>	<u>Segment(s)</u>
0001	Syntax Identifier	UNB
0002	Syntax Version Number	UNB
0004	Sender Identification	UNB
0007	Identification Code Qualifier	UNB
0008	Address for Reverse Routing	UNB
0010	Recipient Identification	UNB
0014	Routing Address	UNB
0017	Date of Preparation	UNB
0019	Time of Preparation	UNB
0020	Interchange Control Reference	UNB, UNZ
0022	Recipient's Reference / Password	UNB
0025	Recipient's Reference / Password Qualifier	UNB
0026	Application Reference	UNB
0029	Processing Priority Code	UNB
0031	Acknowledgment Request	UNB
0032	Communications Agreement ID	UNB
0035	Test indicator	UNB
0036	Interchange Control Count	UNZ
0051	Controlling Agency	UNH
0052	Message Type Version Number	UNH
0054	Message Type Release Number	UNH
0057	Association Assigned Code	UNH
0062	Message Reference Number	UNH, UNT
0065	Message Type Identifier	UNH
0068	Common Access Reference	UNH
0070	Sequence Message Transfer Number	UNH
0073	First/last Message Indicator	UNH
0074	Number of Segments in Message	UNT

4.3.3. Data elements in alphabetical sequence

List of data elements defined for the data segments contained in this message.

<u>Data element name</u>	<u>Tag</u>
Action request/notification, coded	1229
Back order, coded	4455
Carrier identification	3127
Carrier name	3128
Category of means of transport, coded	8325
Change reason	4294
Change reason, coded	4295
City name	3164
Code list qualifier	1131
Code list responsible agency, coded	3055
Communication channel qualifier	3155
Communication number	3148
