

<b>Environmental Policy, Purpose and Scope</b>	
Procedure Number:	<b>ESP 4.2</b>
Process Owner / Approval Authority:	<b>Managing Director</b>
Issue Date: <b>4/10/2013</b>	Revision Date: 10/24/19 Rev. B

## 1. Purpose and Scope

- Magnode maintains adherence to the International Standard in order to ensure:
  - That all legal and customer specific requirements are maintained,
  - Adverse effects to the environment under our control are minimized or eliminated
  - Costs related to scrap and material usages are reduced
  - Our interest in protecting the environment is communicated to the community
- These activities are driven via:
  - Monitoring and measuring of current situations and the Environmental Management System (EMS)
  - Documentation of procedures which define how environmental compliance and improvements are to be maintained
  - Implementation of improvement activities to drive reductions in resource utilization and negative outputs

## 2. Environmental Policy

### **ENVIRONMENTAL POLICY**

“Magnode is a responsible corporate neighbor *and industry leader*, committed to environmental protection, regulatory compliance, pollution prevention, and continual improvement *of the Environmental System.*”

- This is achieved through:
  - Continuous monitoring of environmental aspects and impacts resulting from our manufacturing operations, as well as adherence to all required legal and customer specific requirements
  - Management review of EMS system for current status of system, as well as potential areas of concern and potentials for improvement
  - Adherence to documented procedures reflecting requirements of the International Standard
  - Open communications (in terms of Environmental system performance) with both internal and external interested parties (upon request)
